- **RRP \$36.99 • Paperback • 1/10/2007**

Who are you? This question reveals the complexity of our identity, which can't be confined to just our physical body, experiences, or relationships. In this thought-provoking book, spiritual teacher Michael Singer delves into the nature of self and concludes that our true identity lies in our consciousness—the ability to observe ourselves and our surroundings. Drawing on meditation and mindfulness traditions, Singer demonstrates how expanding our consciousness can help us live in the present, release painful memories, and achieve happiness and self-realization. The book is divided into five parts, offering an accessible exploration of consciousness and its development.
